

## The SQL SELECT Statement

The SELECT statement is used to select data from a database.

The data returned is stored in a result table, called the result-set.

### SELECT Syntax

```
SELECT column1, column2, ...
```

```
FROM table_name;
```

Here, column1, column2, ... are the field names of the table you want to select data from. If you want to select all the fields available in the table, use the following

syntax:

```
SELECT * FROM table_name;
```

The following SQL statement selects all the columns from the "Customers" table:

**Example**

```
SELECT * FROM Customers;
```
